Games, Music, Traveling, Reading, Swimming  
and learning new things

## EXPERIENCE

### Talentio // Software Engineer

Algeries , Algeria | Feb 2022 - Present

I work on a web application that manages human resources and related processes. throughout the employee lifecycle, alongside the Product Owner, QA testers, dev-ops and full-stack developers following the Agile methodology.

- Design and code user interfaces with the assurance of application responsiveness.
- Write clean, testable, maintainable code by using web development best practices.
- Build new futures from the database architecture to the design phase.
- Perform extensive testing in different scenarios to extract obstacles that can slow down the development process and to prevent future issues.
- Optimize Database architecture and performance.

### Emploitic // Web Developer

Algeries , Algeria | Mar 2021 - Feb 2022

Collaborate with the application development team, including the project manager, front-end, and back-end developers,

- Maintain user interfaces by ensuring application responsiveness on all devices and browser compatibility.
- maintain and code using web development best practices using Symfony, PHP.
- Build new futures from the database architecture to the design phase.

### Freelance // Full-stack Developer

Algeries , Algeria | Jan 2019 - Mar 2021

Turning user stories, mock-ups and web designs into functional websites with full support for all devices and browsers compatibility, using HTML, and JavaScript

- Develop and maintain the front-end architecture of the website and user interactions and ensure the responsiveness of applications using HTML, CSS, Javascript, and jQuery.
- Creation of servers and databases for functionality. using PHP and MySQL.
- Provide customers with fast and accurate UI, and solving solving all problems.

## PROJECTS

### CobitHub

<https://github.com/zakaryaghanai/cobitHub>

Simple sign-in and sign-up screens. with the use of Tailwind CSS framework, React HOCs, and React Router.

### Weather Web App

<https://github.com/zakaryaghanai/weather-app>

Simple weather forecasting web built using Vue js, Tailwind CSS, and OpenWeatherMap API.

### GYM Management

Desktop app for gym management using built using vue.js 2, electron js, and sequelize.

### AskCom

<https://github.com/bilalbentoumi/ask-com>

AskCom is a web application similar to stackoverflow built using Laravel 5.7 .
